Polyester strapping

Product Specification Sheet

Width:	16 mm (±0,5)
Breaking strength:	450 kg nominal (±5%)
Elongation	9 - 15% according to ASTM
Length:	850 m
Core mm (ØxL):	76x139
Weight/coil ±5%:	6,30 kg
Weight/box ±5%:	13,20 kg
Packaging:	2 coils/box 80 coils/pallet
Identification:	Standard box label (105x148mm) with: Product No. Type Description Width Breaking strength Length Core dimension Coils per box Weight per box Lot No.
Testing methods:	• ASTM Designation D3950-12a Standard Specification for Strapping, Nonmetallic (and Joining Methods) of American Society for Testing and Materials • DB-Norm BN 918 090
Testing machine:	• Instron Model 3369 Table Mounted Materials Testing System, Capacity 50kN, regularly calibrated and certified by DKD-Deutscher Kalibrierdienst / Calibration laboratory for mechanical measurement: force and material testing machines • Raw material and finished products are tested in our own laboratory
Application instructions:	• Strapping must be tensioned with the proper tensioning tool and sealed with the appropriate buckle in accordance with manufacturers recommendations • Strapping may not be reused • Strapping may not be used for load lifting
Application conditions:	• WOVEN - at elevated temperatures the elongation of the strapping slightly increases and its breaking strength decreases. The stable polyester strapping system (no moving, no changes of strength) can be applied at maximum 200 °C. The woven polyester strapping is not sensitive to deep temperature. • HOTMELT - not recommended at extreme temperatures above 40°C and below 0°C for a long time.
Hazardous ingredients:	These products are not considered hazardous by the criteria of the OSHA Hazard Communication Standard (29 CFR 1910) (USA). Products does not contain any substances (SHVC) defined by ECHA and meet all REACH requirements
Documents available:	• Copy of Testing Report • Copy of DNV•GL certificates for 32mm WOVEN, 2000daN and 2300daN

* HM = Hotmelt WO = Woven
